RE: Docket W-02259A-07-0434

Extension of Certificate of Convenience and Necessity for Sections 16 and 28, T21N,R21W

This is in response to the **Procedural Order dated June 23rd, 2008.**

I would like to clarify that there are NO major deficiencies in the North Mohave Valley Corp. system. The compliance issue is administrative in nature and has nothing to do with the integrity of the system or the quality of the water that is being delivered. The required testing for potential contaminants has been on going and meets all of the appropriate standards.

The administrative issue dealt with lead/copper sampling that is suppose to occur every three years. We missed the window that is specified for the sample taking which resulted in the administrative noncompliance issue. Subsequently the samples have been taken and the results sent to ADEQ. As of yesterday, July 14, 2008, we were informed that the earliest this information can be reviewed is next week. We have also, as per ADEQ requirements, published the prescribed notice in the paper and are awaiting proof of publication from the newspaper, which in turn will be forwarded to ADEQ.

The lack of timeframes for the proposed extension areas has no changed since our last correspondence.

Any further questions, please contact me at 800-624-5263.
